New Livery Sta- Spping's Co. Fl. Extract of Sarsaparilla and

Dies.—FIRE PROOF.—
Having completed my new Livery Stables, I am now ready to receive horses at livery, by the day, week, or month.

My stables are situated on the corner of Princess and Third-streets, directly opposite the Courthouse, and very convenient to the business part of the town. They are built of brick, and covered with tin, which makes them enturely fre-proof. They are large, commodious, and well constructed; and in every respect as comfortable and constructed. with tin, which makes them entirely fre-proof. I also have, (for the accommodation of Drovers,) a large and comfortable Lot, together with a basement under the Stables sufficient to hold one hunand all those evils occasioned by an improper and injudicious use of "mercury," it displays complete control. It has been found to be a most useful

purifier of the blood in all such diseases.

In all complicated cases of Scrofula and Syphilis, and in cases where the Syphilitic virus of the parent causes a development of Syphilis or Scrofu-la in the child, this is the only remedy upon which the hope of recovery can be reasonably founded. It relieves the disease, and at the same time imparts vigor to the whole system—under the use of this medicine, the patient is enabled to take nourishing food, which in other practice is withheld. In many cases where the hornile raysges held. In many cases where the horrible ravages of disease have taken so deep root that patients have been given up by the most skillful Physicians, the disease has been arrested and the patient restored to good health, &c., and the most reasonble expectations fully satisfied.

The cures performed in this city alone, are sufficient to establish its reputation on a permanent basis, and too solid to be effected either by the malignant or envious. It is worthy of note that the greater part of the patients cured had, previously to using this preparation, received the best medical treatment, and given up by their phy-sicians as being beyond the reach of medical skill. t is, however, advisable that it should be given, if practicable, under the superintendence of a phyician, for him to prescribe such other remedies in conjunction with this as the necessity of the case may require. This preparation has put into the hands of physicians a remedy by which he can master a variety of diseases, which have hitherto baffled the greatest skill and study. It is a safe and harmless medicine, and removes all those

BY reading the following affidavit, the publi will learn the origin or rather where the recipe for making the stuff they call Old Dr Jacob Townsend's Sarsaparilla came from-and will be able to judge which is the genuine and original, and of the honesty of the men who are employed in selling it as the original Dr Townsend's Sarsaparilla. Dr S. P. Townsend was the original proprietor and inventor of Dr Townsend's Sarsspa-rilla, and his medicine has gained a reputation that no other remedy ever gained. He manufac-tured over one million of bottles the last year, and s manufacturing at present 5,000 bottles per day.

City and County of New York, ss. William Armstrong of said city being duly sworn, doth depose and say that he is a practical Druggist and Chemist. That some time in the latter part of May, or first of June, 1848, a man by the name of Jacob Townsend, who at that time she would be likely to procure most certain relief.

She was told that if Dr. Swayne's Compound
Syrup of Wild Cherry fulled in the cure, my life
was then hopeless. Your medicine was immediately procured, and the first bottle gave relief, a Syrup of Sarsaparilla. Deponent further says, that he became acquainted with said Townsend at the office of Theodore Foster, Erq., book publisher, with whom said Townsend dealt. That said Townsend had had frequent conversations with deponent respecting the manufacture of an article of Sarsaparilla to be sold under the name of Dr Jacob Townsend.

That said Townsend stated he was an old man and poor, and was not fit for hard labor, and wished to make some money in order to live easy in his old days, and that if Sarsaparilla under the name of Townsend sold so well, and so much money was made by it, he could see no reason why he might not make something out of it too, (his name being Townsend,) if he could get a capable person to prepare a recipe and manufacture it for him. Deponent in one of the conversations asked said Townsend if he was related to Dr S P Townsend, to which he replied that he knew Dr S. P

would be down on him after he should commence but that he did not care for him, as he had formed a copartnership with men who could furnish the requisite amount of capital—and was well prepa-red to defend himself against any attack that might be made on him. Deponent further says that pursuant to the request of said Jacob Townsend, he wrote a recipe for the manufacture of a Syrup of Sarsaparilla and gave it to him. Said Townsend observed that he

wanted to make a specimen to exhibit to his partners for their approval, as he wished to gratify them in every thing, as they furnished all the cap ital ;--said Townsend also told deponent that the ottles they were to use were to be of the same size and shape as Dr S. P.'s, and deponent, at the request of said Jacob Townsend, went to the office of Dr S. P. and procured one of his labels. And deponent further says that he has been in

formed and verily believes the Syrup of Sarsapa-rilla sold as Old Dr Jacob Townsend's, is made after the recipe furnished by deponent to Jacob And further deponent saith not.

FIRE PROOF PAINT.-We have been show some specimens of Blake's Patent Fire Proof Paint, and have examined it with considerable interest, and, so far as we can judge, i appears well calculated to answer all the purposes for which it is recommended, either as a coating for the sides or roofs of houses, or in any other case where a protection against the encroachments of fire or the weather might be desirable. We believe that it is much less expensive than white lead, and, of course, a trial may be very cheaply made. Mr. Wm A. Gwyer is the Agent for this place.

We have not as vet, been able to bestow upon the address, that calm and attentive perusal which the importance of the subject and the high and acknowledged talents of the author bespeak for it; but from the hurried glance which we have taken, we should judge that the aim of the author was to impress upon the minds of his youthful auditors the conviction that chossing a pursuit for life, usefulness rather than display should be consulted, and that honesty, integrity, and energy, can alone ensure success, and confer lasting disthe patriotism and state pride of the young and action.

ATROCIOUS ACT OF TYRANNY-M. BODISCO BANISHED TO SIBERIA.-A Washington correspondent of the New York Courier & Enquirer, reveals a new and most outrageous instance of the tyranny of the Russian Czar very popular-having married an American lady-and being a most amiable and accomplished gentleman. It seems that an edict of the autocrat forbids any of his diplomatic agents from owning any property in the countries to which they are accredited, and M. Bodisco has enriched himself in property exclusively American. His fortune, invested in U. S. stocks and real estate, is estimated at nearly half a million. These facts becoming known to the Czar, through the agency of a spy, he immediately took means to get M. Bodisco into his hands. He summoned him to repair to St. Petersburg without delay, as his counsel was required in a matter of much imhis nephew, Secretary of Legation, as a commission in the army awaited him.

Upon their arrival at St. Petersburg, the nephew was immediately cast into prison, and in Washington, and now, in his old age, he is an exile amid the inhospitable States is ex-officio President of the Senate. wilds of Siberia. We anticipate a long and stormy session of Congress-perhaps as long as the first session of the 30th Congress, which was the longest and most expensive since the formation of the government-but we question much whether one important measure, of a political character, will be passed. The Democrats already have their measures in operation, and need not move-the Federalists cannot. A most eloquent appeal is made to ed that our worthy apponents are taken with such a strong love for the Union, and such a traction, which forms too frequent an accompaniardent spirits about to enter upon the stage of holy horror of disunion. The grand difference between whig and democratic threats of disunion is this-the whig threats come from the North, and are abolitionist, and unconstitutional in their character. The Hungarian refugees are still at Widden in Turkey, under the protection of the Turkish troops. It seems that a Mollah, or Turkish priest, was sent to them to endeavor to induce them to embrace the religion of Mahomet .-Kossuth, Dembinski, Guyon, and others, swore never to desert their religion. Bem had no such scruples. He said that his life was one struggle with Russia, and he would turn Turk or anything else that would enable him to maintain the contest. It is reported that he has taken a public step, and assumes the name of Amurath, and becomes a three-tailed Pasha with the Turks, who have a high opinion of his military genius.

Kossuth has written a letter to Lord Palmerston upon his present position. He thus alludes to the situation of his wife and fami-

Lord Palmerston has, likewise, sent prope nstructions to Sir S. Canning, and has placed the Mediterranean fleet at his disposal, which has, by this time, sailed for the Dardanelles. I have also reason for repeating, that France has imitated the conduct of England, and that the most perfect unanimity exists between the two parties.

The following is said to be the substance of the letter addressed by the Emperor Nicholas to the Sultan, and transmitted by Prince Ra-

" The revolutionary element has been su ressed. The Hungarian war is at an end. send to you my aid-de-camp, who will submit to you various demands calculated to ensure the maintenance of order." The reply of the Sultan to this arrogant

epistle (forwarded by Fuad Sffendi) is no less aconic; its tenor is pretty nearly as follows: "Your aid-de-camp has demanded from me the extradition of the Hungarian refugees.— This demand being of a nature to cast odium on the two powers, I entreat your Imperial

Majesty not to insist on the point." The reply of the Emperor, which was exers between New York and Havre by the way pected with most intense anxiety, would, it was thought, reach the Turkish capital about the 10th or 12th of October. Apprehending that the decision of the Czar might be a declaration of war, the Porte was exceedingly impatient to learn the effect produced upon the cabinets of London and Paris. In order that such may not be the steps of men, but shapes the destiny of nans, to direct aright the ship of State, that nharmed by the billows and breakers of parv strife and sectional feeling.

When we look abroad and mark the different political sects which are springing up in our midst, a scene is presented, not very unlike that, we imagine, which came off about the destruction of Babel, and in a political point of view, we may again not inaptly be

When we scan the history of our country and endeavor to discover the origin and cause of the quarrel between the North and the South, and the political confusion which pervades our land, we are led to believe, that they have had their foundation in the Tariff. When experience taught the Northern States that heir cold climate was not well adapted to the African race—that their slaves were unprofitable—that from their numerous and increasing white population, white labor could be employed to a much greater advantage than slave labor, and that it would probably redound to their interest, to send their slaves South and sell them, lay out their rapital in nanufactories and employ therein white labor: they then brought about a system of emancipation, allowing themselves ample time to transport their slaves South, and thereby they suffered but very little or no sacrifice by the operation. But when their chief interest became manufacturing, and they discovered that

they could not well compete with foreign manufacturers, they then called upon the General Government for protection, or, in other words, to lay such a high duty on foreign trade as virtually to exclude it from our ports and thereby give them the advantage of the whole American market, without looking, or having a care how it would operate, and what it would result. And now let us enquire what effect this high protective Tariff rould have upon the Union and the South.t would not have increased the capital of the ountry, its number of laborers or the stimuus to industry, since it was only taking the profits arising from one branch of industry to raise another branch to a general level. It was compelling the agriculturalist of the South to pay a tax for the support of the of disunion, they must retract and amend their the General Government to advance a local. at the expense of the general interest. In a word, it would have placed the agriculturalist virtually in the power of the manufacturer And to this imposition, we are sorry to say. many Southerners gave aid, being deluded by the fascinations which the cry of "protection to home industry" carried with it, without ever enquiring what home industry was, and how small a portion of it would have been protected, while much the larger and more material portion would have been plundered of its profits. But on the other hand we are

justice of every part, and to the general welfare of the whole Union. But since the North could not succeed in hune at Havana, Oct. 19: bringing about a high protective, or prohibitory Tariff, so as to place the whole American Matanzas, a number of gentlemen proposed to market at its command, it has for a long time been endeavoring, by a peculiar finesse, to was Saint Zachary's day. Leave was refused use slavery as the great lever by which to place the reins of Government into its own hands. And how is this to be effected? Why, by rendering null and void that clause in the constitution which allows three-fifths of the slaves to be representated. And how is that to be effected? Why, by its base and mischiev-ous endeavors to bring about emancipation in however, and as they were denied the one, the slaveholding States, and to make the Genthey declined the other; all the preparations were made, but no dancers were in the halls. The music piped to empty walls, save that his teither of those plans shall succeed, the North will have accomplisted its long desired and selfish aim. It will then out vote the South, and the government of affairs will be almost entirely under its control. It will then bring about as high a tariff as its manufacturing interest will demand, or any other measures its selfish aims may dictate, disregarding the interior due to be South and the courier, which interior due to the South and the courier, which sited due to the South and the courier, which sited due to the South and the courier, which sited due to the South and the courier, which sited due to the South and the courier, which sited due to the South and the courier which sited due to the South and the courier which sited due to the south and the courier which sited for Cadiz." justice due to the South, and the general wel-

fare of the Union. That, to have the reins of power at its command, and to make the agricultural and com mercial interests tributary to the manufactur ing, are the objects of the North in its endeavors to abolish and prevent the further progress of slavery, is beyond the possibility of a doubt The abolitionists have been preaching on the old text that " slavery is a great evil" this and the Camarilla Measures have been tahalf century, and therefore the Government ken to register the names, residences, business should put forth its strong arm to subdue it .-But we would inquire to whom is it an evil? proves that there are those at ho not have a proper feeling about their own rights, nor a correct understanding of the wel-fare of the Union. Mr. Benton, who, by his giant powers, should be standing up for the rights of the South and showing the fallacy Northern movements, has turned the current of his power to the vituperation of Mr. Calhoun, and is giving "sid and comfort" to free-soilism. When a man's ingenuity gets n advance of his honesty, he must be watched, and deserves no longer to be trusted. No sincerity of purpose is the object of his calculations, and no justice is the result of his efforts. We would ask those whose sympathy seems to be so much excited for the condition of the slave, when and where, in the history of the African race, has its condition been better and happier than it is now in the slaveolding States of the South ? Those who will risit and observe the condition of both secons, can testify that the condition of the slaves at the South is much better than that of the free negroes at the North. The Northern States gave their slaves liberty, and what is the consequence of that liberty? Let their unparalleled suffering and wretched poverty inswer. When Northern sympathy proves itself to be nothing but selfish and sectional interest— when its whole aim is to wrest our rights from us-to bar our privileges and to insult our institutions, would not disunion be better !-While Northern fanatics are repeatedly endeavoring to incite the slaves of the South to nsurrection, and to insult our people by sending Abolition pamphlets and papers among hem, would we not prefer to be disjoined from such a people? Disunion would be no worse. This may seem too strong, but how is disunion to be avoided? By yielding and submission? Experience answers, no. Let us show them hat we are not ignorant of their aims-that we perfectly understand our rights and positain them. Yielding adds encroachment to encroachment, and submission, aggression to aggression. Let the South present one unbroken front, and show the Northern fanatics that, as they are guilty of wrong towards the South, and are the cause of the appearances the North cease its endeavore to make the general government an agent for robbing the South of its rights ;-let the fanatic learn that his sympathy for slavery is nothing but hypocrisy; -let them cease their efforts to incite the slaves of the South to insurrection, and to insult our people with Abolition documents. then may sectional feelings die away from the halls of Congress, and the voice of disunion be hushed in our land A SOUTHERNER. He has been initiated into the mysteries of the Albany junto-the secrets of the money changers-the science of stock-jobbing-and Buncombe is in the field Mr. Draper, chief of the forlorn hope in behalf of Col. Webb, at Washington, has found his man; and the topic of a conversation over a bottle of wine, has become a great national measure. Everybody is wondering that the wiseacres of Congress did not think of it before. But the scheme of Mr. Clingman looks suspicious. It has the so long enmonstrified with the bran-bag, and sulphurous odor of Wall street all over it - inflated with crinoline. Henceforth-at least The hoofs of the old monster stick out, though for a season—woman is what she seems: his tail is coiled up in his breeches. Feasting, and as she undulates along the stream of outfeting, and lionizing, a juicy dinner at the Astor House, and the tour of our public insti- embracing wave, old Milton's enchanting pictutions in an Alderman's carriage to the Penitentiary, are hard to be resisted, though all for Buncombe.

There is something of a plot at the bottom. The pensioners of the old bank, who, after betraying and murdering their master and benefactor, have pined away to skin and bone, cannot stand it any longer. Twelve years fast is long enough. It was the father of our present Secretary of the Treasury who was President of the Schuylkill Bank when it broke down; it was Mr. Meredith's collector at Philadelphia who broke up with the Girard concern; it was this last appointment, and others like it, that contributed to the late whig defeat in that city. But still this does not prevent the conspiracy. We may expect all these men, and all those who fattened on the old bank-all who were bought or sold, whether for five, ten, or twenty thousand, or for \$52. 765 371-to go for the new scheme. Mr. Clingman only lifts the curtain. The scene shifters are behind. The treasury is an old cow, whose milk is too rich to be lost. The scheme of Mr. Clingman is but the first movement. Pass it, and a bank comes next in order. Somehow or other the stock-jobbing brotherhood must get into the treasury. Let us have, then, the bill of Buncombe. Then the purlieus of Wall street will become the valleys of the Sacramento and San Joaquin the very sidewalks will be richer in gold than the mines of the desert; bank paper will increase by millions; everything will go up up, until the explosion, when a bankrupt law will wind up the concern.-N. Y. Herald.

AMUSING SCENE. Mr. Freaner, the San Francisco correspon dent of the New Orleans Picavune, under date of August 1st, relates the following incident,

which occurred in a hotel in that place:-I was very much amused in a restaurat a few days since, at a stout, able bodied fellow and proper preparations made for fattening of who had just arrived from "the States" across the mountains. He was dressed in buckskin tention, and if planted in rows as they should breeches, cloth pea-jacket, worn out fashionable vest, buttoned to the chin, a slouched hat and a red shirt none the better for some two months wear. No reply being made to this, off came the red shirt, and followed the coat and vest, leaving him with a dirty, halfworn flannel one. Things now became exceedingly interesting. The restaurat man, evidently a little frightened, looked first at one and then another, as much as to say, " Is he will find their bills in the hands of Mr. Samuel Davis going to shoot?" The only response to his looks from the lookers on, appeared to be, Don't care much if he does." Work to be Done. - Farm-If grain crops be not already sown, they should be attended to early in the month. Wheat and winter rye cannot be sown too early, as the roots must have time to penetrate the soil to a sufficient depth, to prevent their being thrown out during winter. Corn should now be gathered, stock for sale. Root crops require strict atbe, the cultivator may be frequently run be-

the whole is in a state of high improvement. Mr. Charles R. Council, who knows all about the place, (having been Dr. Andres' overseer for several years,) and who is there at all times, will take pleasure in showing it to any person who wishes to look at it.

ALSO, a tract of 25 acres, near the Mineral Spring on Carver's branch, about 3 miles from the above mentioned tract, very desirable as a summer residence.

Terms—One-third of the purchase money to be paid at the sale, the balance to be secured by good bonds, and paid at the end of one, two, and three years.

AT the same time and place with the above will also be sold, on a credit of six months, all the personal property, except the slaves, belonging to the estate, consisting of the crop, horses, a mule, cattle, hogs, a carriage, a buggy, a sulky, a library of well selected miscellaneous books, medical books, maps, prints, household and kitchen furniture. In the same time and place with the above form of the control of the crop, horses, a mule, cattle, hogs, a carriage, a buggy, a sulky, a library of well selected miscellaneous books, medical books, maps, prints, household and kitchen furniture. Any person can boil or stew the root till they get a dark solored liquid, which is more from the coloring matter in the root than from any thing else; they can then strain this lasipid or vapid liquid, sweeten with sour molasses, and then call it "SARSAPARILJA EXTRACT or SYRUP." But such is not the article known as the GENUINE OLD DR. JACOB TOWNSEND'S SARSAPARILLA.

This is so prepared, that all the inert properties of the Sarsaparilla root are first removed, every thing capable of becoming acid or of fermentation, is extracted and rejected; then every particle of medical virtue is secured in a pure

and concentrated form; and thus it is rendered incap losing any of its valuable and healing properties. P in this way, it is made the most powerful agent in the Hence the reason why we hear commendations on every side in its favor by men, women, and children. We find it doing wonders in the cure of CONSUMPTION, DYSPEPSIA, and LIVER COMPLAINT, and in RHEUMATISM, SCROFULA, PILES, COSTIVENESS, all CUTANEOUS ERUPTICNS, PIMPLES, BLOCTHES, and all affections arising from

IMPURITY OF THE BLOOD. It possesses a marvellous efficacy in all complaints arising from Indigestion, from Acidity of the Stomach, from megual circulation, determination of blood to the head, palpitation of the heart, cold feet and hands, cold chills and hot flashes

FEMALE COMPLAIN IS.

It works wonders in cases of Fuor Albus or Whites, Falling of the Womb, Obstructed, Suppressed, or Painful Menses, the menstrust periods, and the like; and s as effectual in curing all the forms of Kidney Diseases By removing obstructions, and regulating the general system, it gives tone and strength to the whole body, and
